**\$978M+ PROJECT
SECTORS**

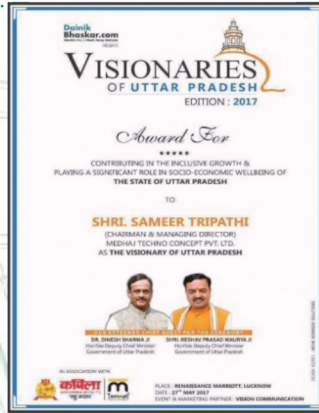

Medhaj Techno Concept Pvt. Ltd. was incorporated in 2007 with the purpose of strengthening the Power Sector Infrastructure in India. In a very short span of time Medhaj has received several recognitions and accolades for contribution in the sector of Power and Infrastructure. The company began with 3 employees in an 800 sq. ft. office. Today we have grown to 1500+ employees PAN India, with a 10,000 sq.ft. Head office in Lucknow, Regional offices in New Delhi, Patna and Ranchi. In these years of company's existence, we have traversed a memorable journey and have come a long way. Our primary objective is to seamlessly blend our professional expertise with our clients' aspirations. Aadiyogi has proudly led the Turnkey Projects, through our Indian counterpart where we've had the privilege to undertake projects across a wide spectrum of themes and industries.

Guided by seasoned experts and supported by professionals with an average of over 30 years of industry experience, our team possesses the prowess to overcome any challenge. With an in-house team equipped with the finest knowledge and resources, we aim to provide you with a sophisticated and cutting-edge setup for your projects.

Aadiyogi was formed to further prioritize staying up to date on the latest industry trends and technologies. Whether it's a Turnkey Project or any other endeavour, our commitment extends beyond meeting clients' needs to consistently exceeding their expectations. Going that extra mile has consistently garnered smiles from our satisfied clients.

We are working towards consolidating ourselves on a very strong platform to contribute significantly to the revolution of Infrastructure development being envisaged internationally. We are a company with zeal and a mission for excellence. To embark on a journey of success one needs the tools of preparedness, foresight and strategy. These lead to the path of growth and high-quality operation. With a global vision and dedication to serve the needs of every client, we are "Shaping a better tomorrow".

I take this opportunity to thank our clients, shareholders and collaborators for the faith and support you have invested in our company home and abroad, and we hope to continue to exceed your expectations and affirm your trust in us.

(to Owners, Designers or Contractors)
- Value Engineering / Design Review
- Cost Analysis and Estimation
- Procurement
- Claims Management
- Troubleshooting (related to a project problem)
- Transactional Advisory Service
- Supply Chain Management
- Artificial Intelligence and Drone Service
- Information Technology services
- Cybersecurity Consulting Services

AADIYOGI offers a wide range of Project and Construction Management Consultation Services.

Capitalizing on our vast experience working with General Contractors with an intricate knowledge of the market, and our passion for the project industry, we transfer this know-how to our Clients ensuring an effective no-nonsense approach in realizing their projects with respect to Cost, Quality, Time and Safety.

Our services encompass all the phases of the project process from Pre-Design through to Completion.

PROJECT MANAGEMENT

We manage the various phases of the project acting as an extension of the Owners' organization.

Depending upon the project requirements, we establish the procedure for the appointment of an Architect/Engineer to produce the design and a Main Contractor to carry out the project.

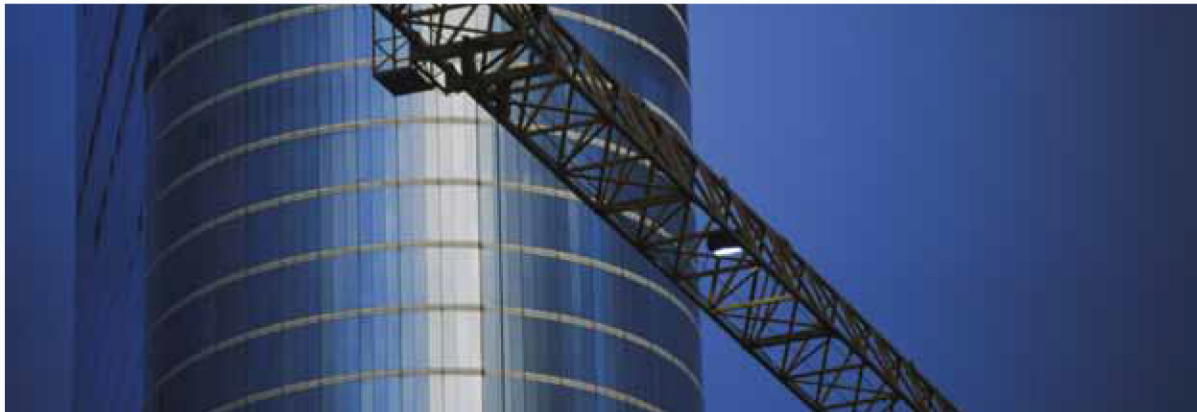

We set the strategy and manage the activities of the A/E and Main Contractors covering all phases from pre-construction through completion and act as the single point of contact with the Owner.

CONSTRUCTION MANAGEMENT

We take on the overall management of the construction of the project replacing the need for a Main Contractor thereby eliminating his margin which is considerably higher than the Construction Management fee.

The project is divided into several trade packages and fully managed and coordinated by us. This option provides a "Construction Arm" for the Owner yielding him significant savings and flexibility with a higher level of control on Cost, Time and Quality.

It also allows 'Fast-Tracking' projects allowing construction works to start before the design is fully completed.

DESIGN MANAGEMENT

We manage the Design process for the Owner guiding him in seeking the appropriate Architect and specialty Engineers (Structural, Electrical, Mechanical, Other), managing and coordinating their activities and deliverables while ensuring design coordination, construction compatibility and efficiency through the various stages of the design process (Concept, Preliminary, Final through Tender Documents).

TENDER MANAGEMENT

We manage the Tender process on behalf of the Owner by short-listing qualified contractors from our extensive database of contractors and vendors, distributing the Tender Documents, following up on Tender queries, evaluating bids technically and commercially and making recommendations to the Owner. We also prepare the contract to be signed between the Owner and the successful Contractor(s).

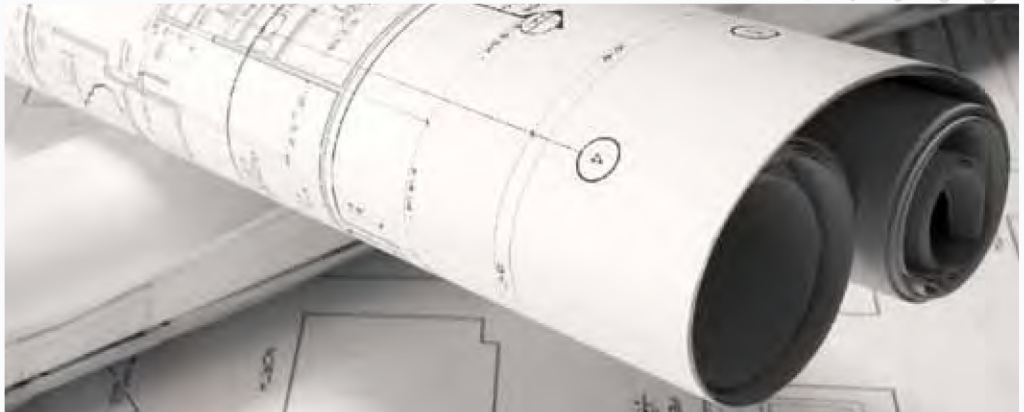

CLIENT REPRESENTATION

We represent the Owner and monitor the works of the various parties (Project Manager, A/E, Consultant, Contractor) acting as the point of contact between the Owner and the involved parties and coordinate matters that require his approval in an efficient fashion giving him advise to make correct decisions.

CONSULTANCY SERVICES

These services can be provided to Owners, Designers or Contractors:

- Value Engineering (Design Review)
- Cost Analysis and Estimation
- Procurement
- Claims Management
- Troubleshooting

VALUE ENGINEERING (DESIGN REVIEW)

We review the Design and make recommendations in order to achieve optimum value by evaluating design options, analyzing all aspects of the design including systems and materials to make it more efficient and less costly.

COST ANALYSIS AND ESTIMATION

We evaluate the price of a specific project.

This can be done at budgetary level, prior to completion of the design based on assumed performance specifications, or at an accurate level, once a full design is complete.

We can also provide this service to a Contractor tendering a project competitively.

PROCUREMENT

We survey the market, recommend vendors and subcontractors, issue Requests for Quotation, analyze offers technically and commercially and make recommendations to our Client for all his project procurement needs.

We can also prepare the Purchase Order on behalf of our Client.

CLIENT MANAGEMENT

We review and respond to Claims submitted against a Client ensuring his best position contractually. Additionally, we can prepare claims on behalf of a Client.

TROUBLESHOOTING

We analyze and provide recommendations for specific project concerns.

- Project start-up
- Project Organization review
- Issues related to Cost
- Issues related to Quality
- Issues related to Progress
- Issues related to Claims
- Issues related to Project Documents

TRANSACTIONAL ADVISORY SERVICE

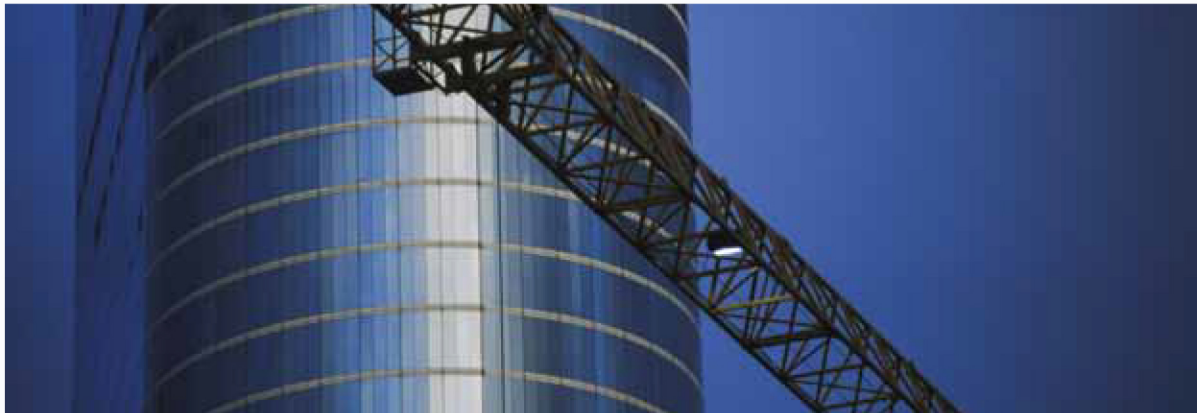

Our transaction advisory services can help you navigate through your domestic and international transactions with ease and confidence. We offer business valuation services based on extracted historic information and forecasting models that mirror future outcomes.

SUPPLY CHAIN MANAGEMENT

We help companies manage the complexity of transforming their supply chains into future-ready supply chain networks that balance the evolving expectations of customers, employees, investors and others, fuel profitable growth, and do business the right way.

ARTIFICIAL INTELLIGENCE AND DRONE SERVICES

We are a leading developer and provider of AI-backed intelligent solutions assisting in cutting-edge drone services solutions to cater your business needs for inspection, monitoring, survey and mapping or other activities for different sectors.

INFORMATION AND TECHNOLOGY SERVICES

We provide technology solutions and services to enterprises across industries such as Banking & Financial, Healthcare etc. Services include consulting, software development, systems integration, as well as hardware deployment and education.

CYBERSECURITY CONSULTING SERVICES

Our strategic and technical subject matter experts fully understand your cybersecurity needs. We set out to assess, develop, implement, and manage end-to-end next-generation solutions tailored to your needs.
